PUMP GROUP

UNDERGROUND DEWATERING PUMPS

pumping the better way

Highlift Underground Dewatering - Decline Development Pumping -

guaranteed **reliability**

Specifically designed & engineered to work in the highly abrasive and corrosive applications associated with high pressure mine de-watering. Specific emphasis has been placed on using the correct materials of construction and coatings to ensure we have achieved the lowest possible operating costs.

At Uni-Flo, mine dewatering is our business. From principles and engineering to sales and service personnel, our key staff members

have more than a century of combined industry experience. We aim to help you achieve your goals and objectives with high quality and reliable pumping equipment.
